

Will be changed to:
Docs/Images

When clicked, you will get two choices:

If you click on **docs**, it will lead you to the page we currently have except the “images” folder will be changed to another folder (whet ever we want that is text based). I am thinking

-minutes (just like it is) **-misc** (just like it is) **-vrpa** (rules, society act, membership requirements, etc)

If you click on **images**, it will take you to a new page that has:

OUR MEMBERS - Gamesroom and other stange stuff

AQUAPIN

DONARNOLD

EVENTS

**Fabulous Fantasies
2007**

- Images will be customizable, so they do not need to match your members section.
- Two members/events per row, so the initial folder image can be recognized
- All members can create folders and upload or delete images. Problem with admin doing part, members each having private access, etc is it will cost big \$\$ to program. So any abuse will result in an account suspension for 1 month (we can track IPs, so we know who is guilty).
- Members folders are an option, not everyone will want one or use it, so it will be nice to have it as an easy add/delete option
- No limit to pictures
- All pictures will be thumbnails that will increase when clicked.
- Adding this picture feature will increase our monthly hosting fees as our bandwidth use will increase (but worth it).
